

Hex Bolts

Hex bolts (six sided heads) are the industry standard for fasteners with forged heads. ASTM A307 grade A bolts, all SAE hex bolts, and several other common specifications require a standard (finished) hex head. For specifications such as A307 grade B, A325 and A490 that require a heavy hex pattern, refer to dimensional tolerances for heavy hex bolts or structural bolts.

MANUFACTURING

QIFENG HARDWARE manufactures hex bolts from 1/2" diameter through 2-1/2" diameter in most ASTM, IFI and SAE specifications. **The Hot Forged products and special products are our strength.**

What we can do?

Diameters: 1/2 - 2-1/2" Cold from, Hot forged and Turning

Grade: ASTM A307 Grade 2, Grade 5, Grade 8

Lengths: 100" maximum

Finish: Black and hot dip galvanized, ZP, YZP, etc.

Dimensions per ASME B18.2.1 last version.
